GULF S-DRAW 700

Very high performance, high viscosity metal forming lubricant for multiple applications

Description

Gulf S-Draw 700 is a very high performance metal forming lubricant designed to be used neat. This product is highly viscous and has been specially designed for very difficult pipe bending and highly arduous drawing applications. Superdraw 700 has been tried and tested by many customers who have previously had difficulty finding a product that works well for very difficult applications, and in all cases this product has been highly successful whereas other similar products have failed.

Gulf S-Draw 700 derives its performance from a unique synergistic blend of high lubricity and extreme pressure additives which help to provide the user with a lubricant capable of meeting the most demanding requirements in terms of surface finish and tool life.

Gulf S-Draw 700 is compatible with a wide range of materials including high alloy and stainless steels as well as non-ferrous metals

Benefits

- Excellent lubricity
- Outstanding EP performance
- Operator friendly
- Excellent surface finish
- Enhanced tool-life
- Low odour

Applications

Tube drawing, tube bending, heavy duty pressworking.

Typical Physical Properties & Storage

Appearance	Pale yellow liquid	STORAGE <ul style="list-style-type: none">• Store in a cool, well ventilated area• Store inside, ideally between 10°C and 30°C• Store away from direct heat and frost• Shelf life 12 months from the date of manufacture• Avoid water collecting on the barrel top
Odour	Bland	
Specific Gravity at 20°C	1.21	
Viscosity at 40°C	700 cSt	
Flash Point	> 200°C
